

About Us:

Lloyd Worrall Group (LWG) was established in 1911 and is now part of Grafton Group plc with locations across the UK including Northern Ireland.

We are a recognised premier architectural solutions provider to both the commercial and housing markets, supplying and specifying architectural Ironmongery, high performance commercial Doorsets, Access Control & Door Automation and a range of modular Handrail and Balustrade solutions.

Our BIM Objects:

Our Interspec Doorset BIM objects are the first of their kind to offer user selectable ironmongery sets based on the function of the space in which the door is to be used.

The range of GENERIC BIM objects cover single, double and “leaf and a half” variations which includes a full range of fire ratings with a choice of finishes and material variations.

The Legal Bit:

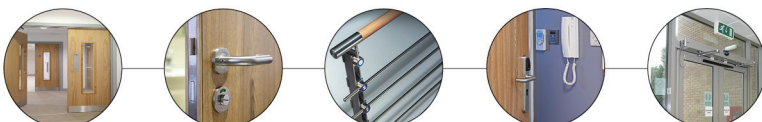

Due to the numerous configurations of door and ironmongery sets, LWG Interspec Doorset BIM components are GENERIC Doorset objects to facilitate the design and operation of a building. Our BIM objects are intended for use by professional personnel competent to evaluate the significance and limitation of our BIM objects.

LWG hereby disclaim all warranties and conditions with regards to these BIM objects including all implied warranties, fitness for a particular purpose, workmanlike effort and non-infringement. In no event shall LWG be liable for any direct, indirect, punitive, incidental, special or consequential damages or damages for loss of profits, revenue, data, down-time, or use arising from or in any way connected with the use of the content or performance of any services, whether based on contract, tort, negligence, strict liability or otherwise. LWG disclaims any responsibility to update any information, including with respect to any new legal, business or technology developments.

Get in Touch:

We welcome comments or suggestions and encourage users to share their experiences of applying our Interspec Doorset BIM objects on projects with us.
